## Ultra "High" Frequency

Commercial aviation in Canada and the United States is set to be revolutionized by the Trans-Canada Air Lines of this type of ultra-high frequency radio system.

The new system links Vancouver and Victoria in the ultra-frequency spectrum which does away with wire and static. Tucked away high in Hotel Vancouver is the transmitter and the photo shows S. S. Stevens, superintendent of communications and electronics, as he demonstrates the set. All one has to do is pick up an ordinary telephone and press a button to obtain instantaneous voice communication over the 44 miles in length. The installation marks the first commercial use of this type of ultra-high frequency radio system in Canada and probably on the Continent also. The system is used exclusively by the armed forces.

British Servicemen Get Snapshots of S. S. Their Families

Servicemen like to have pictures of their families in familiar home surroundings rather than against the formal studio background. Every branch of the Y.M.C.A. is now turning up even mobile cameras, in order to supply such pictures. The men make their appointments which are forwarded to London headquarters. Then a corps of 1,000 amateur photographers goes into action. They are volunteers who take photos and send them to the service. They are volunteers who take photos and send them to the service.

# THE MILITARY GOVERNMENT MAY TAKE OVER GERMANY WHEN ITS ARMIES ARE BEATEN

WASHINGTON—The state department declined today what has started on regarding an Allied military government to be set up in Germany and its activities have been based on either direct or circumstantial surroundings.

Chancellor with German threats to prolong the war while seeking a negotiated peace, the department gave positive evidence that the Allies have no intention of giving Germany a voice in their own immediate post-war future and are going ahead instead of arrangements to handle Germany in their own way.

Robert D. Murphy, diplomatic relations of the North Atlantic states, was named to be the United States top diplomatic representative to help set up and operate the Allied military government over Germany. He will have the rank of ambassador and for the time being apparently will be attached to the staff of the Eisenhower.

One of his first assignments probably will be to attend the forthcoming conference between Prime Minister Churchill and President Roosevelt where the problem of controlling Germany and rendering her incapable of making future wars are expected to be discussed.

The scheme to be reached by the Anglo-American forces, if accepted and imposed into Marshall's hands, may furnish much of the force to be imposed on Germany after unconditional surrender.

Meanwhile Allied forces pouring into Germany and directed at the German army is showing their power.

1. The longer the Germans stay in the line the longer the peace is postponed on them. They cannot expect the same sort of settlement which they could have had if they had surrendered immediately after Allied invasion of France and Belgium.

2. Continuation of the war is exhausting the German nation, cutting the German people's resources in food and wealth. They have much more to lose than the Allied powers by getting it over with.

3. The Nazi leaders, having no hope will try to fight to the complete destruction but the German armies can counter this madness by surrendering individually and in small groups until there is little organized resistance left.

## WODEHOUSE TALKS

Says He Made A Terrible Mistake But Meant No Harm

LONDON—Author P. G. Wodehouse, who made five broadcasts over the German radio during his imprisonment in Germany, was quoted in a dispatch from Paris as saying he believes he made "a terrible mistake" but meant no wrong.

In an interview with a London Daily Sketch correspondent, J. Dore Dawson, at the French capital, the 65-year-old Wodehouse said:

"While I was in camp I had received 50 letters or more from readers in the United States and I thought I would like to answer them more or less in a broadcast about how I got along in camp."

I arranged for a series of five broadcasts during my life in the five camps where I had been. I never intended to do any more than this and never did.

The British author, creator of "Jeeves", the all-wise butler, known to millions of readers, was caught by the Germans late in May, 1940, in his villa at Le Touquet, France, and spent several months in a prison internment camp, but in 1941 he was allowed to move around in Berlin on his own.

"I assume it was mainly because I was a friend of G. K. Chesterton's," Mr. Wodehouse said, "that I was spared. I was a year and was allowed to go."

## ADMIRAL'S OPINION

Baron Keyes Says End Of European War Too Nearer

War Time Widener MONTREAL—Admiral of the Fleet Baron Keyes said he believed the European war would be over by early winter and that the Japanese campaign would end "much sooner than most people think."

The hero of Seabreeze in the First Great War, and founder of the navy in the United States, Baron Keyes spoke to the Canadian Club in a meeting of a speaking party that included Sir John A. Macdonald, Toronto, Winnipeg and Vancouver. After that, he said, he would fly to New Zealand and Australia "on government business."

## BOMB BASES

Drive Is Made To Free British From Menace

WITH BRITISH TROOPS EAST OF THE SEINE—A British general issued today a report that the drive to wipe out the German flying bomb bases in northern France was about to start.

"For the first time in this war we are fighting directly to free our homes, our cities and our children from German attacks," he said.

"Every day we advance reduces the area from which we can launch our most dangerous weapons," the general said, "and we are about to start the final drive to wipe out the source of this threat."

"We are also in the van of the last stroke of the war in Europe," he said, "and we are about to start the final drive to wipe out the source of this threat."

"This is the country from which the German flying bomb is launched," he said, "and we are about to start the final drive to wipe out the source of this threat."

"Let us drive forward relentlessly," he said, "and we shall be free of this menace in a few days."

## DISORGANIZED ENEMY

Thousands of Nazis Runled by in French Camp

LONDON—The battle for southern France and southern of the German last army ended, according to a dispatch from London, with the German army in a state of complete disorganization.

"The great part of the army to which Adolf Hitler entrusted the defence of southern France against the British and American forces," he said, "is now in a state of complete disorganization."

"The British and American forces are still on a steady advance," he said, "and the German army is now in a state of complete disorganization."

## WANT TO QUIT

A Ghastly Review Of The Nazi War Picture

LONDON—In a ghastly review of the Nazi war picture, the British Daily Mirror today implied that Germany would be willing to cease fighting if the Allies would release their war prisoners and substitute an attitude of reason and better understanding.

"The high command propaganda," he said, "is now in a state of complete disorganization."

me about the dust bowl. But I didn't want my trouble. I thought it was weeds. So I went on killing weeds, pulverizing the soil with cross cultivation as usual, and sowing wheat. Three inches of top soil picked up from my hillside and blew into the gully. I planted alfalfa as a root crop to bind together what was left of the soil. But it took at least a thousand years to form the top soil I had lost in three days."

Those of us who went through the "dust bowl" of frigid living, unemployment and depression after the last war, are sick at heart and uneasy of mind when we think of the years ahead. But most of us are still inclined to think that we are troubled only by the weeds.

When we finish rooting out Hitler, Himmler and a few other trouble makers here in our own country, we think we can go on to cultivate our fields or markets as usual. We forget the drift.

It was moral drift after the last war which led us into a decade of triviality, and then into a decade of collapse. Men fought for high standards of living and forgot their high standards of life. This moral collapse was followed by economic collapse. World War II ended unemployment and put business back in the black. But it has not halted moral drift which may now run on into economic collapse more desperate than we have ever known. It may, in fact, blow up into a storm of such revolutionary force that our whole civilization, built up over the past two thousand years, is swept down into the gully.

There is an alfalfa crop that we can plant in time to hold our homes, our industry and our

whole way of life together? We might find it on our own doorstep. And if I took a two hour walk the other day, I saw a teen-ager. We got dead honest with each other about ourselves. I know my dad—but he knows me. And he knows me.

This simple honesty, together with the fiber of alfalfa roots, drew together a father and son who were drifting apart. What might it do for menagement and labor, nation and nation, race and race, class and class? We don't have to wait for world statements to begin. As the farmer starts in his own fields to re-erect drifts which we can put a new moral line into a drifting world and start in our own backyard.
